DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks/Arguments, filed 9/13/2006, with respect to the rejections based on 35 USC section 112 have been fully considered and are persuasive. The 35 USC section 112 rejections of claims 1-2 and 5-9 have been withdrawn.
2. Applicant's arguments filed 9/13/2006 with respect to the 35 USC sections 102 and 103 have been fully considered but they are not persuasive. The applicant's main argument is that Brown does not teach a gateway. The applicant is arguing that though the term "gateway" is not defined by the applicant's specification, a gateway "is a standard telecommunications terminology, and a gateway at minimum connects two networks which have different protocols".
3. In response to this argument, the applicant's "gateway" does nothing to connect two networks having different protocols. In fact there are not even two networks disclosed by the applicant. The applicant argues that reference number 41 is a wired network but the Examiner can find no support for this assertion anywhere in the applicant's specification. Given that the applicant's specification has nothing to do with a "gateway" as the applicant now defines it, it is unreasonable for the applicant assume that the claimed "gateway" would have interpreted as such. Rather, it is reasonable to interpret a gateway as "something that serves as an entrance or a means of access", as defined by American Heritage Dictionary, because that is all that the applicant discloses.

Claim Rejections - 35 USC § 102

Art Unit: 2142

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 5 is rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent Number 6,295,638 to Brown et al.

6. Claim 5 is rejected for the same reasons as in the office action mailed on June 14, 2006.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1-3 and 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 6,295,238 to Brown et al. in view of U.S. Patent Number 6,389,589 to Mishra et al.

9. Claims 1-3 and 6-7 are rejected for the same reasons as in the office action mailed on June 14, 2006.

Art Unit: 2142

10. Claims 4 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 6,295,238 to Brown et al. in view of U.S. Patent Number 6,389,589 to Mishra et al. in further view of U.S. Patent Number 6,263,360 to Arnold et al.

11. Claims 4 and 9 are rejected for the same reasons as in the office action mailed on June 14, 2006.

12. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 6,295,238 to Brown et al. in view of U.S. Patent Number 6,263,360 to Arnold et al.

13. Claim 8 is rejected for the same reasons as in the office action mailed on June 14, 2006.

Conclusion

14. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
